

Clinical Data – Expert Opinion

Arthrosis Treatment of Arthrosis of the Knee by Dr Ole Asbjorn, GP, MD. PainGone seems to have an effect which is on the same level as drugs. PainGone can therefore be an alternative pain killing treatment to patients waiting for an operation.

Tennis Elbow Treatment of Acute Tennis Elbow by Dr Ole Asbjorn, GP, MD. 76% of the patients had effects ranging from good to excellent pain relief. "PainGone is effective as a painkiller and is a good supplement to other treatments."

Sciatica Dr Med. Bernt Fesers study carried out tests on sufferers of spine syndromes, elbow pain, sciatica, knee arthrosis and phantom-limb pain. The percentage of patients experiencing temporary or continuous pain relief after the use of PainGone ranged from 50%- 86.7%.

Arthritis Dr Reka Puskas, October 2004, Rheumatologist Budapest hospital "We have established the effectiveness of using PainGone, it is an effective device for chronic pain suffering patients. Because it is handy and easy to use, it can contribute to an improvement in the quality of life for patients who respond well to treatment."

Mobility and Back Pain The most recent UK study, on patients suffering from back pain, has shown "significant reduction in pain at rest, on movement and improved mobility". The Doctor in charge reported that "Many of our patients have been really pleased with the results and in several cases we have witnessed a dramatic life altering change". The report continues "the use of PainGone resulted in significant reduction in pain, increase in mobility and reduction in daily analgesic consumption."
